

As a large systems integrator, Northrop Grumman integrates the products of many vendors.

The company keeps a close watch on emerging security technologies and policies to ensure the solutions are state of the art and can integrate with existing facility management and employee notification systems and can escalate calls to first responders.

Benefits of the Northrop Grumman Solution:

- Extensive customer CNS/ATM customer base and experience
- Open architecture and future proofed systems
- Scalable solutions
- Proven delivery and performance
- Unique technology solutions and services
- Technology resident and sustained within Europe
- Domain expertise/risk analysis
- Expert systems integrators
- Security cleared personnel
- Extended lifecycle and through-life customer support
